iFlights Features

iFlights web-based system with flexible graphical user interface, in order to facilitate system usability. High level security structure already implemented for any account login including users' authentication and authorization levels. I-Flights focus in covering core business of aviation companies .

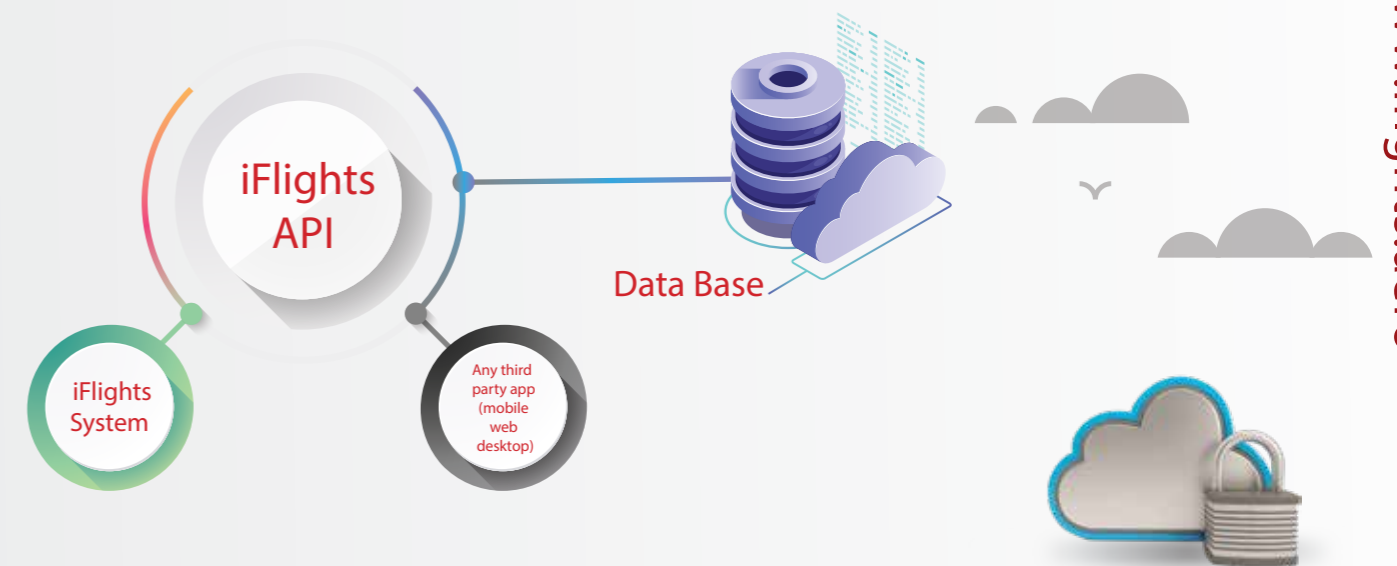

iFlights Extensibility

iFlights is extensible system, can be also integrated with third party systems i.e. mobile applications, web systems and desktop systems.

System Technical Specifications

- Operating System:
The application will be a Web based .NET application with latest Framework running over latest version of Microsoft Windows Server and latest version of Internet Information Server IIS.
- Database engine:
Backend database should be implemented using MS SQL Server.
- Front end Will be developed using Microsoft C#, MVC 5, HTML 5, Angular JS, XML.
- Data export/import options will be implemented using webAPi 2.0 or MVC controllers which will be the layer to between presentation layer of system (web based, desktop or mobile) and business layer of application.
- Mobile application will be IOS and Android based.
- Reports will be generated in these formats: PDF, CSV, Excel, RTF, XPS.

iFlights Security

System security is based on ASP Net Identity 2.0 with OAuth integration with the following supported features:

- Two-Factor Authentication via email or SMS messaging.
- Account Confirmation via email.
- Administrative management of Users and Roles.
- Account Lock-Out in response to invalid log-in attempts.
- Security Token Provider to regenerate a user's security token in response to changes in security settings.
- Easy Integration of Claims-Based Authorization.

- Plan guide Report that helps site manager in creating duty plan for all site pilots, then to initiate plan on iFlights and finally our system will notify pilots with the new or modified plan

Training Module

- Managing all learning transactions for the company staff by follow up all applicable courses,
- Licenses, checks and training programs with its affection to scheduling and planning.
- Fully Integrated with Rostering Module by release only available crew to be assigned on duty and/or site availability,
- Ability to handle requests from Rostering to allow release more crew in case of emergency by changing training plan.

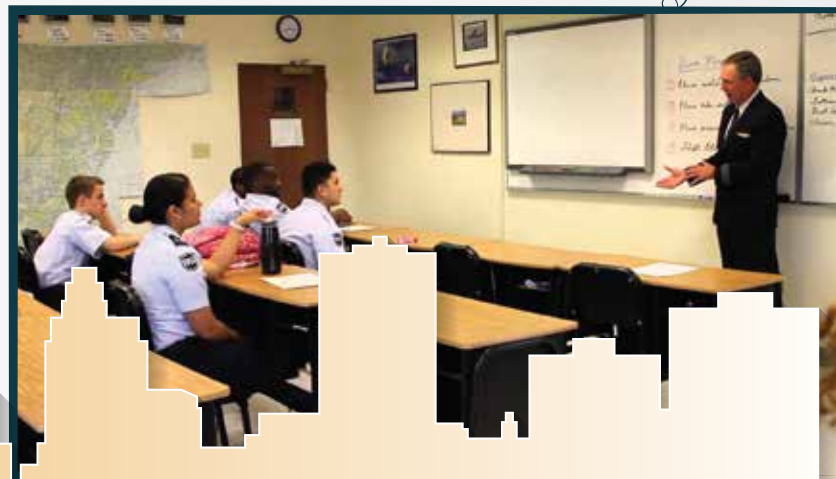

Pilot Profile Management and monitoring .

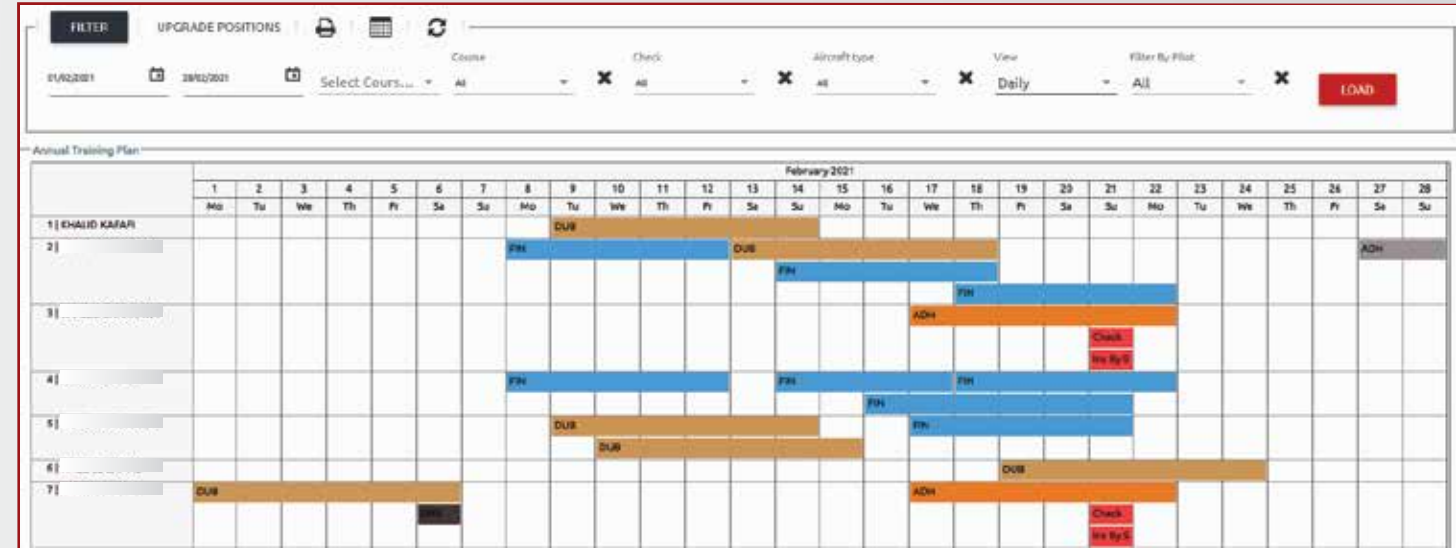

- Alert functionality if prerequisite requirements are not attained.
- Ability to track and, if desired, automatically update crew records and expiry information.
- Manage Annual Monthly Training Plan

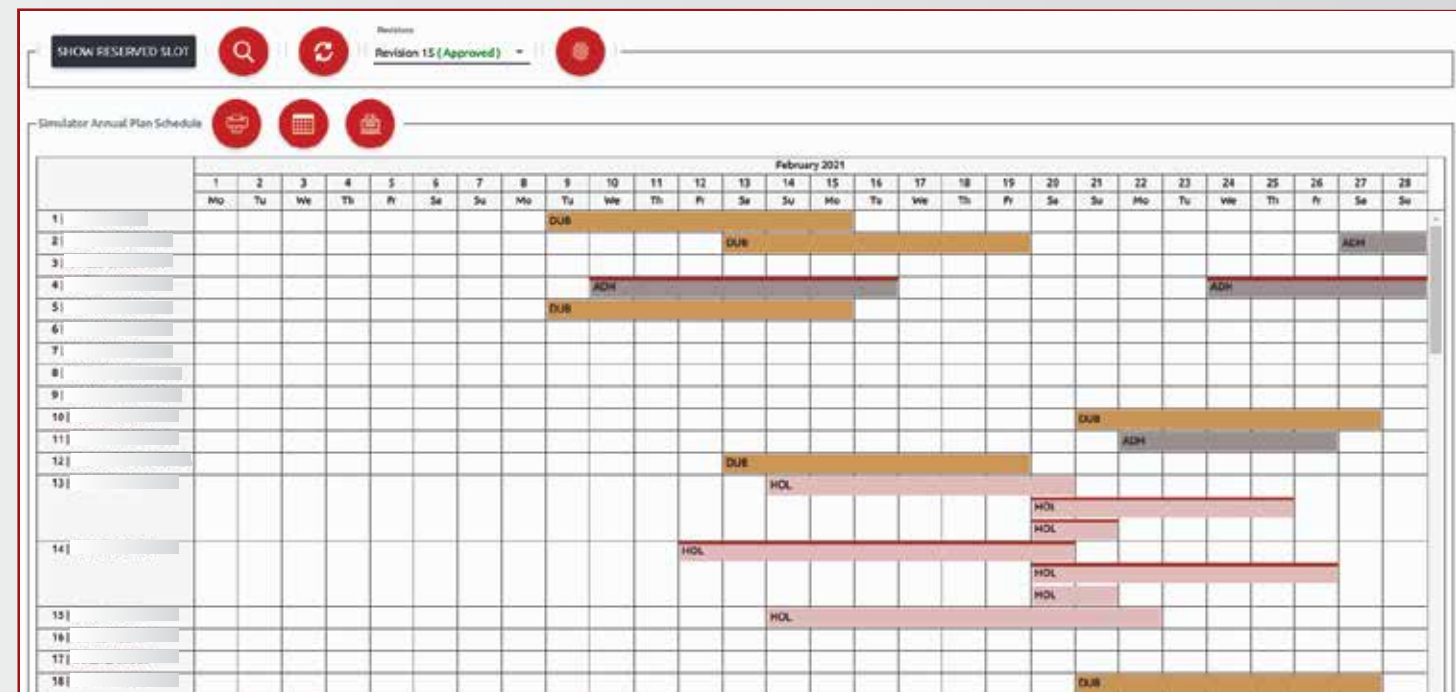

- Notification system for following up applicable courses, licenses, checks and training programs .
- Planning of recurrent and initial training .
- Build your company Training Manual on system dynamically .
- The ability to create dynamic rules related to a course prerequisite.

- Training Annual Plan that can be generated from iFlights regarding pilot profile data and courses with checks due dates

- Simulator annual plan can be generated from pilot simulator due dates and specialist will be able to do changes on it and do various revisions, then manager will be able to approve it, In order to help specialists to process hotel reservation for pilots travelling abroad for simulator

MONTHLY TRAINING

after preparing annual plan and simulator plan then specialists can view monthly training which view data according to all setting in annual plan to set the actual training.

RECORD TRAINING RESULTS

last step to record the training results and once the result get approved from training manager it will affect inside iFlights pilot profile

GROUND TRAINING NOTIFICATIONS

in case that training type is ground training (inside or outside) iFlights will send notifications and mails to employee who responsible for booking class room and instructor

Rostring Module

- Schedule version management
- Automatic generation of crew availability on sites/fields using user defined rules based on Crew AC types and sites AC types used in it.
- Manage sites min crew requirements based on clients' needs
- Fully integrated with Training module by fulfilling training requirements/needs to apply training plan.
